ALPHABETICAL LIST OF OCCUPATIONAL TERMS SHOWING THE CODE NUMBER OF THE HEADING TO WHICH EACH IS TO BE REFERRED.

The figures denote the Code Number of the Heading under which the Occupation will be found.

If an Occupation is expressed by more than one word, and is not found under the first, it should be sought for under each successive word.

Sometimes an Occupation which does not appear in the Alphabetical List may be found under a description which is only a slight variation from it.

It has been found necessary to include in the Classified and Alphabetical Lists many names which are purely local and some which are scarcely more than nicknames.

APPENDIX.

INSTRUCTIONS TO CLERKS EMPLOYED IN CLASSIFYING OCCUPATIONS.

1. **Particulars to be coded.**—The Schedules are to be coded in column (k) in regard to the personal occupation which the person is following or has followed, and also in regard to the status (*see* Instruction 21) which he or she occupies or occupied in that occupation.

A detailed statement showing the various occupational terms in use in this country at the present time will be found on pages 14 to 90. These are assembled into groups which are identical with the titles in the Occupational Classification. The groups themselves are further classified under Orders and Sub-Orders, a list of which is given on pages 1 and 2, while on pages 3 to 13 these are shown along with the groups of which they are composed.

The coder should first learn the arrangement and full titles of the Orders and then of the Sub-Orders and groups.

2. **Identification of Appropriate Heading.**—The proper group to which an occupation should be classed may be found by means of the Alphabetical Index used in conjunction with the Classified List.

So far as the productive occupations are concerned *the classification is dependent upon the material worked in*, and it will be seen that the majority of the terms in the Alphabetical Index are qualified by a word or words which imply the material worked in, the trade or service in which the occupation is met with, or in some cases a definition of the occupation. Regard must be paid to these qualifications in deciding to which heading an occupation should be coded. The business of the employer as shown in Column (l) will often furnish an indication of the material worked in, for example :—

Column (k).	*Column* (l).
Planing Machinist.	Machine Tool Makers.

The business of the employer (Machine Tool Maker) at once suggests that the person is working in metal, and reference to the Index and the Classified List shows that the code number for a "Planing Machinist" in the metal trades is 200. Had the information been "Planing Machinist in a Sawmill" it would have been clear that the person was working in wood, and reference to the Index and the List would have shown that 486 was the correct code number. Again, take the term "Dyer"—reference to the Index shows the following trades in which it is usually met with :—

Dyer (Clothes)	Code Number 381
Dyer (Feathers)	,, ,, ... 632
Dyer (Fur)	,, ,, ... 335
Dyer (Leather)	,, ,, ... 335
Dyer (Leather Gloves)	,, ,, ... 335
Dyer (Photo Plates, etc.)	,, ,, ... 688
Dyer (Straw Plait)	,, ,, ... 428
Dyer (Textile)	,, ,, ... 381

Should the coder come across the term "Dyer" in connection with a trade which cannot be reconciled with the above list the entry must be referred to the supervisor. If, however, he finds a term which is unqualified in the Index, e.g. Surgeon, Bricklayer, Sheet Metal Worker, Motor Mechanic, then it may be taken that, unless the person is returned as an Employer in Column (l) the occupation is to be given the code number shown in the Index, whatever the industry may be.

In deciding to which group an occupation should be coded regard must also be had to the position or status which the person occupies in his or her trade or business, e.g. whether an Employer, Manager or Foreman, and whether working on "Own Account" or in the employ of anyone, and the following rules are to be observed.

(*a*) **Employer in Column (l).**—Look up the term as given in Column (k) in the Index or the Classified List; if it is shown in these as qualified by the word "Employer," then code accordingly.

If the term is not so qualified and in the Order or Sub-Order to which it is classed there is a group "Employers and Managers," it is to be coded to that heading. If there is no such group in the Order or Sub-Order, and the group to which the term is classed in the Classified List has not the letter E marked against it, then it is to be referred to the supervisor.

(*b*) **Manager in Column (k).**—Look up the business carried on by the employer and code to the heading "Employers and Managers," if such exists in the Order or Sub-Order to which the employer's business is classed. If there is no such heading the rule for employers in similar cases is to be followed. If, however, the manager is in charge of a special department of the business corresponding with any of the headings for "Employers and Managers" in the Classified List other than that appropriate to the employer's business, entry should be made under this heading. For example :—

Column (k).	*Column* (l).
Sales Manager	Gramophone Factory, Code 770 and not 640
Advertising Manager	,, ,, Code 779 and not 640.
Cabinet Factory Manager	,, ,, Code 470 and not 640.
Machine Shop Manager	,, ,, Code 160 and not 640.
Counting House Manager	,, ,, Code 931 and not 640.

A General Manager in a Gramophone Factory would, however, be coded 640.

The following terms may be regarded for coding purposes as synonymous with Manager :—

Assistant Manager.
Assistant Manageress.
Chairman.
Company Director.
Departmental Manager.
Director.
Factory Manager.
Factory Superintendent.
General Manager.
Manageress.
Managing Director.
Mill Manager.
Staff Superintendent.
Under Manager.
Warehouse Manager.
Works Manager.
Works Superintendent.

(c) **Foreman or Overlooker in Column (k).**—Look under "Foreman" or its synonym in the Index and Classified List; if the term is found there, code accordingly.

If it is not found there, look under the trade or branch of trade in which the person is Foreman, and if the group as thus found is marked (F) in the classification, code accordingly. If the group is not marked (F) and in the Order or Sub-Order in which the trade or occupation is classed there is no group "Foreman and Overlookers" then the entry is to be referred to the supervisor.

If will be seen that in Orders VII (Metal Workers), and XII (Textile Workers), Foremen are classified according to the branch of work in which they are engaged. Care must be taken that Foremen in these sections are correctly classified.

The following terms may be regarded as synonymous with "Foreman":—

Boss.	Overlooker.
Charge Hand.	Overman.
Charge Man.	Overseer.
Factory Foreman.	Store Foreman.
Factory Overseer.	Stores Foreman.
Forewoman.	Supervisor.
Gaffer.	Warehouse Foreman.
Ganger.	Yard Foreman.
Head Man.	

(d) **"Own Account" in Column (l).**—Look up the occupation in the Index and Classified List and code accordingly, but remember that under no circumstances must a person who is returned as "On Own Account" in Column (l) be classed to a group entitled "Employers and Managers."

3.—**Assistant Foreman, Under Foreman.**—Persons so returned are not to be classed as Foremen, but are to be dealt with as follows:—

Look up in the Index and Classified List under Assistant Foreman or whatever synonym is used, and if the term is found there, code accordingly.

If the person is returned as Assistant Foreman over a particular gang of workers, e.g. Riggers, Sailmakers, Bricklayers, &c., code to the occupation in which he is Assistant Foreman.
